

## Next Gen™ Burners

The die-cast alloy base is coated with a

non toxic powdered coating that is

resistant to most chemicals

## Teachers and Lab Tech Testimonials

"I love the simplicity of the safety features to make my class safer."

- High school chemistry teacher "This burner does not tip and still fits under all our stands."

- Community college teacher "Should have been thought of 100 years ago. Great design, nice work."

- 8th grade physical science teacher

The square base with extended broad legs

prevents the burner from tipping

even when connected to a hose
