

New Lab Start-up: Quality Control Testing

Situation Analysis

- **Decision:** Design and build a QA/QC laboratory to support new manufacturing facility
- **Goal:** Deliver a turnkey laboratory solution
- **Challenge:** Facility located in an extremely remote location requiring specialized logistics and delivery plans

Partnership Approach

- Fisher Scientific engaged their partners to develop detailed lab designs including furniture, fume hoods, utilities, safety features and requirements for instrumentation
- Fisher Scientific identified equipment and instrumentation bundles, recommended products essential to day-to-day operation including consumables and chemicals

Customer Value Delivered

- Provided expertise that did not exist with EPC
- Developed supply chain solution for shipping and delivery of all materials to the facility
- Dedicated Project Manager in US and Technical Manager on-site for installation and training
